SUBJECT INDEX

Volume 88

Advection inversion 479
Aircraft data 211
Atmospheric surface layer 399
Big-leaf model 87
Blending height 145
Coastal
  internal boundary layer 103
  jets 23
Convective boundary layer 47, 87
Correlation functions 161
Doppler lidar 343
Eddy
  diffusivities 479
  fluxes 239
Effective roughness lengths 145
Empirical orthogonal functions 399
Flow over hills 323, 333
Forests 363
Heat flux 425
Inertial dissipation method 161
Internal boundary layer 103, 479
Kansas measurements 121
Kolmogorov scaling 161
Lagrangian stochastic model 77, 467
Land-surface characteristics 307
Large eddies 343
Large-eddy simulation 121, 181, 363, 425
Louis scheme 239
Low-level jet 445
Marine boundary layer 23, 211
Mixed-layer model 1, 87
Moisture transport 445
Monin-Obukhov theory 255
Nocturnal boundary layer 181, 255
Numerical prediction 279
Parameterisation 47
Plant canopy 467
Priestley-Taylor coefficient 87
Ramp structures 363, 399
Rayleigh-Benard convection 211
Sahel drought 307
Sea breeze 23, 103
Slab model 103
Surface
  energy balance 1, 279
  flux parameterisation 47, 239
  temperature 279
Temperature fluctuations 399
Thermal internal boundary layer 103
TOGA-COARE 47
Trajectory curvature 77
Turbulent dispersion 77, 467
Turbulent
  statistics 363
  transport 425
